DETAILED ACTION

Priority

Receipt is acknowledged of papers submitted under 35 U.S.C. 119(a)-(d), which papers have been placed of record in the file.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-4 are rejected under 35 U.S.C. 102(b) as being anticipated by Eguchi et al (EP 1 065 115).

Eguchi et al disclose all the limitations of the instant claims including: a plurality of solenoid valves **SV** that shut the brake hydraulic circuit; and a plurality of variable orifices **D** that variably reduce brake force of the wheel cylinders **WC** after the brake pedal is released, by taking advantage of a brake fluid flow to the master cylinder, wherein the solenoid valves and the variable orifices are connected to the brake hydraulic circuit in parallel. See figure 6, and paragraph [0104] which suggests a flow control valve for the restriction **D**.

Regarding claim 2, Eguchi et al disclose relief valves **RV**.

Regarding claims 3-4, Eguchi et al disclose check valves **CV**.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. US# 6336689 and US# 6056373 who show braking devices.
